

WESMAR COMPANY, INC.

Introducing *High TDS Cooling Water Treatment*

Our patented treatment method is a major advance in cooling water treatment and water conservation technology!

This technology provides the following benefits verses standard cooling water treatment for your facility:

- Zero forced water discharge, or blowdown—in most cases resulting in ***huge water and water cost savings.***
- Green chemistry uses naturally occurring silica and alkalinity in your source water for ***unmatched corrosion protection.***
- Scale forming ions removed from source water to ***eliminate scale formation potential.***
- High TDS/alkalinity in cooling water naturally inhibits bio and pathogen growth, ***eliminating the need for toxic biocides.***
- Water cost saving typically provide ***quick return on investment for our proprietary pre-treatment equipment.***

More information regarding this revolutionary technology can be found at www.water-cti.com, or contact Wesmar directly at 1-800-824-4917.

Call today for more information or a water savings estimate

This technology and treatment method is protected by U.S. patent numbers 6,929,749; 6,949,193; 6,998,092; and 7,122,148
